

115,000

People currently need organ transplants in the U.S.

10

People die everyday while waiting for their transplant.

Campaign to Help Save Lives

The Fund For Philanthropy (TFFP) and Smart Perfusion LLC, inventor of VASOWAVE®, a breakthrough medical device designed specifically to keep organs fully alive and functional outside of the human body, have formed a strategic partnership to raise \$5 Million (US) to save lives. VASOWAVE® emulates the pressure, flow, and pulsation characteristics of the human cardiovascular system and optimizes conditions to preserve healthy, viable organs. VASOWAVE® has the potential to facilitate recovery of a larger number of viable organs each year from a large pool of organs that are currently discarded.

Legal Disclaimer:

*VASOWAVE® is an investigative device in the preclinical stage of development. It has not yet been tested extensively on humans or approved for commercial sale by the FDA or by any other regulatory body. **Together we can save lives!***

Legal Note: The Fund for Philanthropy, Inc. (Tax ID# 80-0878355) is an IRS recognized 501(c)(3) donor advised fund, tax exempt public charity as described in the Internal Revenue Code Sections 501(c)(3), 509(a)(1), and 170(b)(1)(A)(vi).
